

SAFI ULLAH

BS CS Student & Front-End Web Developer

Haripur, Pakistan | +92 319 3365470 | safiullahmalik087@gmail.com | LinkedIn: /in/safi-ullah-b80840318|
GitHub: @safiullah-087 | Portfolio: safiullah.dev

PROFESSIONAL SUMMARY

Passionate Computer Science professional with extensive experience in web development and full-stack software engineering. Adept at designing complete systems from concept to deployment, combining analytical problem-solving and optimization skills to build scalable, object-oriented solutions. Dedicated to writing clean code and making a meaningful impact in software development.

EDUCATION

Bachelor of Science in Computer Science (BS CS)

Pak-Austria Fachhochschule: Institute of Applied Sciences and Technology (PAF-IAST) · 2023 - 2027

Intermediate / FSC (Computer Science)

Jinnah Jame School and College: Haripur · 2021 - 2023

Matriculation / SSC (Computer Science)

Jinnah Jame School and College: Haripur · 2019 - 2021

EXPERIENCE

Front-End Developer | *SMC Tech Solutions*

Built collaborative projects utilizing HTML, CSS, and JavaScript. Focused on mobile-first design philosophy, building responsive layouts, and optimizing user experience.

Back-End Developer | *M Tech Production*

Provided full-stack web development services, focusing on modern web design, scalable backend logic, and delivering seamless user experiences.

Front-End Developer | *Freelance Group*

Built and maintained dynamic web pages using HTML, CSS, and JavaScript. Managed project lifecycle from concept to deployment to meet client-specific goals.

KEY PROJECTS

Nexcent Web Application (*Web App / UI*)

Designed and developed an interactive informational web application highlighting professional growth milestones, structured layouts, and engaging user interfaces.

Safi Ullah - Portfolio *(Full-Stack / React)*

Built a personal portfolio website featuring responsive grid layouts, dynamic project showcases, smooth animations, and a contact integration system.

Weatherly Web App *(Frontend Dashboard)*

Created a real-time weather tracking dashboard consuming weather APIs to display forecast metrics, atmospheric conditions, and clean visual representations.
